SECURISTYLE DEFENDER

STANDARD FRICTION STAYS

- Extended enclosed end cap to enhance weather sealing Asymmetric location system for reliable weather sealing
- Handed 'profiled' vent arm further enhancing weather seal
- Patented lipped slider for enhanced smooth operation
- Easy friction adjustment without metal to metal contact
- Long and reliable working life tested to 30,000 cycles
- Unique patented, robust cam friction device eliminates any risk of friction screw misuse

SECURISTYLE DEFENDER

EGRESS FRICTION STAYS

- Allows casement windows to comply with Building Regulations for fire escape windows
- 16" Hinge opens to a full 90° for emergency exit
- Composite slider with stainless steel release lever mechanism allows cleaning access from the inside of the building
- Automatically resets to the fire escape mode when the window is closed
- Self-lubricating PTFE based coating on end cap provides smooth closing
- Die cast support plate in bottom slider ensures consistent performance

SIDE HUNG

Securistyle Defender
Standard Friction Stays Long and reliable working life tested to
30,000 cycles

SECURISTYLE DEFENDER

RESTRICTED FRICTION STAYS

- Built-in mechanism limits initial opening
- Extended enclosed end cap to enhance weather sealing
- Built-in release lever allows the window to be fully opened for easy cleaning
- Restrictor automatically relocates and resets when the window is closed

*Side hung restricted friction stays sold singularly require an opposite hand standard friction stay. As only one side hung restricted friction stay is required this must be fitted as the bottom friction stay. Top hung restricted friction stays are sold in pairs and must be fitted as pairs.

SECURISTYLE STORM

STANDARD FRICTION STAYS

- Unrivalled weather sealing from its asymmetric metal point and cap as well as smooth reliable operation
- Capable of achieving high gust loading
- Complies to the requirements of AAMA 101, 904 and 910 for cyclic, strength and weather performance testing
- Superior carrying capacity of up to 120kg
- Composite slider eliminates metal to metal contact for a long and reliable working life
- Track width 23mm

It is only by consistently developing our products and services that we will remain global leaders. Together with the whole team, we pledge to listen to our customers, to anticipate their future needs and deliver, consistently, with professionalism that sets us above and beyond our clients' expectations.

SECURISTYLE

DETACHABLE RESTRICTOR (KEY RELEASE)

A069

- Easy to fit with no routing
- Non handed product to reduce stock inventory
- Can be used on windows without reinforcement
- Suitable for 16mm to 18mm cavity heights
- Compatible with all Securistyle commercial hinges
- Key available separately
- 16mm stack height

CODE	PART NUMBER	TRACK LENGTH	PIVOT ARM LENGTH

SECURISTYLE

PERMANENT LIGHT DUTY RESTRICTOR

A066

- In normal operation the restrictor allows the vent to open until the slider engages against the opening stop in the track
- Capable of complying with BS6375–2 and EN13126–5
- Device provides additional friction for windows
- Available in ferritic* stainless steel
- 10 Year Guarantee (details available upon request)
- 13mm stack height

OLIVÉ SILICONE SEALANTS

CODE	COLOUR	
D70	White	

CODE	COLOUR	
S10	Clear/White, Bronze, Grey, Black	

CODE	COLOUR	
H198	Grey	

OLIVÉ
D70 ACRYLIC SEALANT

- Acrylic sealant used for sealing joints with moderate movement, and for filling cracks
- Paintable surface after 1 hour
- Water based. Low odour.
- Compatible with paint
- Free of solvents, isocyanate and silicone
- Good UV resistance, weather- and ageing-resistant
- Adhesive to most common building substrates

OLIVÉ
S10 UNIVERSAL SILICONE SEALANT

- Low modulus acetoxy silicone sealant
- Contains anti-fungal agent
- Excellent adhesion on glass and aluminium
- Quick skinning and curing time

OLIVÉ
9009 MIRROR SILICONE

- It does not attack the mirror silver
- Excellent adhesion strength
- Does not lift
- Solvent free
- Does not shrink

OLIVÉ

C–22 SILICONE SEALANT

- Low modulus neutral silicone sealant
- Contains anti-fungal agent
- **Excellent adhesion on all Porous and Non-Porous surfaces:** concrete, glass, aluminium, PVC, plastics, wood
- Low modulus and high elasticity
- High movement capability
- Excellent adhesion to a wide range of substrates without priming
- UV radiation, weather and ageing resistant
- Extremely long service life
- Low odour
- Non-corrosive

OLIVÉ

SG–71 SILICONE SEALANT

- One component structural glazing silicone
- Also comes in a sousage
- High tensile strength (structural bonding applications)
- UV radiation, ozone, weather and ageing resistant. Long service life.
- Excellent long-term adhesion durability
- Low odour
- Neutral curing
- Non-corrosive. Contains no solvents or Isocyanates.
- Developed for 2 sided and 4-sided Structural Glazing
- Designed specifically for the structural Bonding of Glass, Metal and other materials
- Available in 600ml

OLIVÉ

MS-35 HYBRID ELASTIC SEALANT/ADHESIVE

CODE	COLOUR
MS-35	White, Grey, Black

- Available in cartridge and sausage
- High elasticity and movement capability (+/-25%)
- Fast curing. Nearly no shrinkage
- Can be applied to damp surfaces
- Excellent adhesion to a wide range of material
- Very good UV-, weather and ageing resistance
- Silicone, isocyanates and solvent free. Non-corrosive
- Easy to apply, even in adverse conditions and low temperatures
- Permits painting, even immediately after application, with water based paints and many other systems (to be tested)

OLIVÉ

H197 HYBRID ADHESIVE SEALANT

CODE	COLOUR
H197	White

- High performance mechanical properties
- Fast curing, nearly no shrinkage
- Excellent adhesion to a wide range of materials
- Very good UV, weather and ageing resistance
- Silicone, isocyanates and solvent free
- Non-corrosive
- Easy to apply, even in adverse conditions and low temperatures
- For both interior and exterior applications
- Can be applied to damp surfaces
- Permits painting, with water based paints and many other systems (test previously)
- Suitable for bonding mirrors

OLIVÉ

H181 - CRYSTAL CLEAR ADHESIVE

- Transparent sealing and adhesion
- Absorbs impact and vibration
- High level of adhesion and ultimate resistance
- Multi-Support Adhesive

H181

OLIVÉ

TQ10S - CHEMICAL ANCHOR

- Quick Curing
- Vertical and Horizontal Application
- Styrene Free
- Polyester Resins

GHI LUBRICANT SPRAYS

GHI LUBRICANT SPRAYS

800 SILICONE LUBRICANT

- High quality clear silicone lubricant
- Non-marking
- Non-drip
- It will not melt, burn or freeze between temperatures of - 40°C and 280°C

GHI LUBRICANT SPRAYS

801 MULTI-PURPOSE LUBRICANT

- A multi-tool in a can

H150

H149

Penetrating Oils:

These specific penetrating lubricants are intended for penetrating via capillary action into the minute crevices and cracks and loosening rusty or stuck fasteners or components. Penetrating oils are light oils with very good capillary action and water dispersing action, working their way into tight situations and providing a release action, loosening "stuck" parts. These oils leave a residual coating which acts as a preventative coating against further corrosion. The penetration oils provide a short term protective coating and soon evaporate. For long term protection, depending on application, a silicone spray; white grease or chain spray may be better suited, Penetrating oils can also harm or stain certain plastics.

Silicone Lubricant Spray:

Silicone aerosol lubricant applies a longer lasting lubricant coating to moving parts, reducing friction and wear on drawer sliders; door hinges; blinds; sewing machines; etc. and eliminates squeaking noises and the like. Silicone based lubricants are excellent for rubber, plastic, glass, etc. They provide excellent UV resistance, water protection, heat resistance and lubrication and are great for restoring and protecting rubbers and plastics etc. Silicone oils do stain fabrics so take care near clothing etc. They also work well as an anti-spatter in the welding industry. Great for lubricating tent zips; sealing tent seams and the list goes on and on.
